The newly established Computer Laboratory is located in the Laser and Optronics Center and comprises of fifty (50) state-of-the-art computer systems, interconnected through high speed network/internet. This lab. is intended to conduct computer based courses such as computer language courses, hands on trainings of computer based Scientific tools and workshops for faculty members and students of the Physics Department to enhance their computer skills. The Computer laboratory serves the purpose for both undergraduate and postgraduate students in analyzing, simulating and results for their course projects. Lab. is also useful for the students of M.Sc. and PhD and the faculty members in conducting their research.
